

**Top quality and active environmental protection are prerequisites for the sustainable success of Sixt in the market. The following principles are therefore a central component of our corporate policy:**

- Our company is focused on producing products and services of the highest possible quality. The goal is the satisfied and enthusiastic customer.
- Every employee is personally committed to quality and environmental standards.
- Our suppliers are included in our corporate policy as partners. We support our suppliers in the sense of quality and environmental thinking, but also demand the highest product and service quality from them for the benefit of both sides.
- We strive to avoid errors in all company processes. Zero defects is the goal.
- The use of the best available technology, taking into account its economic efficiency, guarantees capable, safe, environmentally compatible and energy-efficient production processes.
- In order to secure the site for future generations, we operate sustainably, resources, environmentally friendly and energy-saving.
- Maximum quality also includes compliance with demanding environmental standards. In this context, we are committed to complying with applicable legal obligations and other requirements. Legal and official requirements represent a minimum criterion.
- Quality, service, costs, technology, environmental protection and occupational safety are constantly being improved and developed. The continuous improvement of our energy utilisation is an important contribution for us to reduce energy consumption.
- Risks are assessed at regular intervals in all areas of the company and, if necessary, appropriate countermeasures are defined.
- -and, if necessary, appropriate countermeasures are defined.
- Our Code of Conduct is the guideline for our daily actions! Employees and subcontractors are required to comply with our legal and ethical guidelines of conduct.
